1 / Annex 1

CENTRAL INTELLIGENCE AGENCY

25X1A

Legend

1. Workshop
 - a. Spray painting shop for aircraft parts.
 - b. "Galvani" shop, not yet in operation. This shop had six tubs, 3x1.5x3 meters, to be used for refining aluminum parts.
 - c. Ship construction section with equipment for the construction of five vessels simultaneously.
 - d. Aircraft assembling and developing shop.
 - e. Pressing shop with steel presses, drop shears, electric welding and spot welding machines. This shop pressed steel plates and ribs for coast guard vessels.
2. Workshop No 9, manufacturing aircraft wings and horizontal and vertical stabilizers.
3. Workshop No 28, equipped with ten automatic screw cutting lathes and producing screws.
4. Assembly shop for fighters. This shop also worked on the overhauling of IL-2 planes.
5. Workshop, used to store machinery [redacted] but later 25X1A to be equipped as an assembly shop.
6. Annealing shop for coast guard vessels. This shop had eight electric annealing furnaces, and the installation of more such furnaces was planned.
7. Instrument shop.
8. Aluminum section with refining baths and smelting furnaces on the ground floor and offices on the upper story.
9. Workshop with equipment similar to No 8 above. It was believed that these two workshops were connected administratively.
10. Workshop.
 - a. Workshop No 12, forge with ten electric hammer furnaces, one oil-fueled hammer furnace and several steel presses. This shop forged and pressed iron slugs.
 - b. Electrical workshop.
 - c. Storeroom and the main spare parts depot.
11. Oxygen shop under construction.
12. Workshop No 13, equipped with presses and shears and working on steel plates for ship construction.
